

AJAY DHIMAN

Flutter Developer | 5+ Years of Experience in Cross-Platform Mobile Development

dhiman221195@gmail.com | [+91-8684838182](tel:+91-8684838182) | linkedin.com/in/ajay-dhiman-90075919a | [Portfolio](#)

PROFESSIONAL SUMMARY

Flutter Developer with 5+ years of experience shipping 10+ cross-platform mobile applications across fintech, healthcare, logistics, and telecom. Skilled in Dart, Flutter, and BLoC state management, with a track record of integrating REST APIs, GraphQL, and Socket.IO for real-time data flow and driving measurable performance gains, including a 30% reduction in data processing latency. Immediate joiner, seeking to contribute my expertise in Flutter and mobile application development to a product-based or service-based organization focused on building high-quality mobile applications.

CORE SKILLS

- **Mobile Development:** Flutter, Dart, Android SDK, Kotlin, Java
- **State Management:** BLoC (primary), GetX, Provider, setState
- **Architecture:** Clean Architecture, MVVM, MVC
- **API Integration:** REST APIs, GraphQL, Socket.IO, Retrofit, JSON Parsing
- **UI/UX:** Material Design, Responsive Layouts, Custom Animations, Jetpack Components
- **Testing & Debugging:** Unit Testing, Widget Testing, Bug Fixing, Performance Optimization
- **Version Control & Collaboration:** Git, GitHub, Jira, Agile/Scrum, Code Reviews
- **CI/CD & DevOps:** GitHub Actions (automated testing, build automation, App Store/Play Store deployment), SDLC
- **Cloud & Backend Services:** Firebase (Auth, Firestore, Cloud Messaging, Remote Config), Google Maps API, Payment Gateways (Stripe, Razorpay)
- **Local Data & Architecture:** SQLite (Local Database), Dependency Injection, Secure Storage
- **AI Experience:** AI-powered investment assistant (Magnifi), AI Prompt Engineering, AI Workflow Automation
- **AI-Assisted Development:** ChatGPT, Claude, Cursor, GitHub Copilot, Code Generation, Debugging, Refactoring, Documentation, Test Case Generation, Code Review, Development Automation

TOOLS

- Android Studio, VS Code, Xcode, Postman, Firebase Console, GitHub, Figma, Jira, Google Play Console, App Store Connect

EXPERIENCE

Digi Mantra Labs

Flutter & Android Developer

Mohali, India

Nov 2023 – Present

- Spearheaded end-to-end development of cross-platform apps in Flutter, serving thousands of active users across fintech and telecom.
- Architected real-time financial features for a US stock market investment app using **GraphQL and Socket.IO**, achieving sub-second data latency for live trading decisions.
- Implemented **BLoC state management**, reducing data processing latency by ~30% and improving UI transition smoothness for a smoother, more responsive user experience.
- Applied **SQLite for local data persistence**, **dependency injection** for scalable, testable architecture, and **secure storage** to protect sensitive user data such as auth tokens.

- Built and maintained **GitHub Actions** CI/CD pipelines for the investment and telecom apps, automating unit test runs on pull requests, APK/IPA builds, lint/static analysis, and deployment to Play Store and App Store, cutting manual release effort.
- Integrated secure REST APIs and Firebase Authentication, Firestore, and push notifications, enabling reliable login and real-time data access for thousands of active users while reducing authentication-related support issues.
- Conducted code reviews and mentored junior developers on Flutter best practices and clean architecture, raising overall code quality across the team.
- Delivered features within Agile/Scrum sprints, including planning, stand-ups, and retrospectives tracked in Jira.

Appentus Technologies Pvt. Ltd.

Jaipur, India

Flutter & Android Developer

Feb 2022 – Oct 2023

- Built logistics and last-mile delivery apps in **Flutter with GetX** state management, supporting real-time shipment tracking for thousands of users.
- Integrated **Google Maps API** for live driver tracking, route optimization, and geofencing, significantly improving delivery efficiency for carriers and shippers.
- Debugged and refactored legacy code, improving app stability by 30% and reducing crash rates, directly cutting user-facing disruptions.
- Shipped digital invoicing, push notifications, and real-time order-status updates through full deployment on Google Play Store and Apple App Store, improving user engagement and operational transparency.

Mobiloitte Technologies Pvt. Ltd.

Delhi, India

Android Developer

Nov 2020 – Jan 2022

- Developed native Android apps in **Kotlin and Java** using **MVVM architecture** for a healthcare telemedicine platform, ensuring maintainability and scalability.
- Built real-time video/audio consultation features using WebRTC SDKs, enabling seamless doctor-patient consultations for remote healthcare delivery.
- Set up **GitHub Actions** workflows for the telemedicine platform to automate PR testing, builds, and store deployment, reducing manual release overhead.
- Used Jetpack Components (LiveData, ViewModel, Room) and Retrofit for networking and local data caching, improving app responsiveness and offline reliability.
- Implemented secure authentication, session management, and role-based access control, safeguarding patient data and meeting healthcare compliance requirements.

KEY PROJECT PORTFOLIO

Magnifi | *Flutter, BLoC, GraphQL, Socket.IO* | *AI Fintech*

- Engineered an AI-powered investment co-pilot for the US stock market with real-time analytics and portfolio insights.
- Built real-time stock data feeds via Socket.IO with state orchestration in **BLoC**, ensuring accurate live market updates.
- Automated testing, build, and release workflows using **GitHub Actions**, streamlining PR validation and store deployment.
- Implemented JWT-based authentication and transactional features meeting US financial compliance standards.

Mobile Petrol Station (Pilot & Customer) | *Flutter, BLoC, Real-Time Tracking, Maps Integration* | *On-Demand*

- Built a two-sided fuel delivery ecosystem with **BLoC-driven** state management for live order tracking and delivery sync.
- Integrated turn-by-turn navigation and route optimization across vehicle types.

Links: [Google Play](#) | [App Store](#)

EarthLink / *Flutter, GetX, GraphQL, REST APIs* / *Telecom & ISP*

- Delivered a subscription management platform for a US ISP covering Fiber, 5G, and Satellite plans.
- Optimized state management with GetX across complex account workflows, supporting enterprise plan upgrades up to 5 Gbps.
- Used **GitHub Actions** for automated builds and deployment pipelines, ensuring consistent release quality across account management updates.

Ph7 Doctor & User Suite / *Kotlin, MVVM, Jetpack, Retrofit* / *Healthcare*

- Built a telemedicine platform with real-time video/audio consultations, appointment booking, and encrypted patient records aligned with HIPAA practices.
- Implemented **GitHub Actions** CI/CD for automated testing and store deployment, supporting reliable healthcare app releases.

Courier-Market / *Flutter, GetX, Google Maps API* / *Logistics*

- Built a carrier/shipper bidding marketplace with live shipment tracking and automated invoicing, using clean MVVM architecture.

Links: [Google Play](#) | [App Store](#)

Ramatou Express / *Flutter, GetX, Google Maps* / *Delivery*

- Built a courier ecosystem with separate Driver/User apps for live tracking and route navigation.

Links: [Google Play](#) | [Developer Page](#)

RealEnglish / *Flutter* / *Education*

- Developed an educational language-learning platform in Flutter featuring interactive modules for learners.

EDUCATION

- **Post Graduate Program in Java (PGP Java)** — NIIT Limited, Connaught Place, New Delhi, India
- **B.Sc. Computer Science** — Maharshi Dayanand University (MDU), Rohtak, Haryana
- **Intermediate (12th Standard)** — H.B.S.E Board, Haryana

KEY ACHIEVEMENTS

- Reduced data processing latency by ~30% via BLoC-based state management optimization (Digi Mantra Labs).
- Improved app stability by 30% through systematic bug resolution and refactoring (Appentus Technologies).
- Shipped 10+ applications to Google Play Store and Apple App Store across six industry domains.
- Delivered enterprise-grade real-time systems using GraphQL and Socket.IO for financial-grade responsiveness.
