

Ajay Dhiman

Flutter & Android Developer | 5+ Years of Experience

dhiman221195@gmail.com | [+91-8684838182](tel:+91-8684838182) | linkedin.com/in/ajay-dhiman-90075919a

PROFESSIONAL SUMMARY

Highly skilled Flutter and Android Developer with **5+ years of experience** designing, developing, and deploying scalable, high-performance mobile applications across fintech, healthcare, logistics, and telecom domains. Proficient in **Dart, Kotlin, and Java** with deep expertise in state management (GetX, Bloc), real-time data integration, and cross-platform development. Demonstrated ability to collaborate in agile teams to deliver enterprise-grade solutions, optimize application performance, and ensure seamless user experiences on both iOS and Android platforms. Seeking to leverage technical expertise and domain knowledge at a leading MNC to drive impactful mobile solutions.

TECHNICAL SKILLS

Mobile Development: Flutter, Android SDK, Dart, Kotlin, Java

Architecture & Design Patterns: MVVM, Clean Architecture, MVC, Bloc Pattern, GetX

State Management: Bloc, GetX, Provider, setState

Backend & API Integration: RESTful APIs, GraphQL, Socket.IO, Retrofit, JSON Parsing

Cloud & Third-Party Services: Firebase (Authentication, Firestore, Cloud Messaging, Remote Config), Google Maps API, Payment Gateways (Stripe, Razorpay), In-App Purchases (Android and iOS)

UI/UX: Material Design, Jetpack Components, Custom Animations, Responsive Layouts, XML

Testing & Quality: Unit Testing, Widget Testing, Code Reviews, Bug Fixing, Performance Optimization

Tools & DevOps: Android Studio, VS Code, Git, GitHub, Jira, Postman, Google Play Console, App Store Connect

Methodologies: Agile/Scrum, SDLC, Continuous Integration & Deployment (CI/CD)

PROFESSIONAL EXPERIENCE

Digi Mantra Labs

November 2023 – Present

Flutter & Android Developer

Mohali, India

- Spearheaded the end-to-end development of high-performance, cross-platform mobile applications using Flutter, serving thousands of active users across fintech and telecom sectors.
- Architected and implemented complex financial features for a US stock market investment application, leveraging **GraphQL** and **Socket.IO** for real-time data streaming with sub-second latency.
- Optimized application state management using **Bloc pattern**, resulting in smoother UI transitions, improved scalability, and reduced data processing latency by approximately **30%**.
- Collaborated with cross-functional backend teams to design and integrate secure **REST APIs** and **Firebase** services including authentication, push notifications, and Firestore.
- Contributed to code reviews, technical documentation, and mentored junior developers on Flutter best practices and clean architecture principles.
- Followed Agile/Scrum methodologies with sprint planning, stand-ups, and retrospectives using Jira for project tracking.

Appentus Technologies Pvt. Ltd.

February 2022 – October 2023

Flutter & Android Developer

Jaipur, India

- Developed comprehensive logistics and last-mile delivery solutions using **Flutter** and **GetX** for state management, enabling real-time shipment tracking for thousands of users.
- Integrated **Google Maps API** for live driver tracking, dynamic route optimization, and geofencing capabilities, significantly improving delivery efficiency.
- Managed the complete app development lifecycle from initial design through deployment on both **Google Play Store** and **Apple App Store**, adhering to platform-specific guidelines.

- Resolved critical production bugs and refactored legacy code, improving overall app stability by **30%** and reducing crash rates significantly.
- Implemented digital invoicing, push notifications, and real-time order status updates to enhance user engagement and operational transparency.

Mobiloitte Technologies Pvt. Ltd.

November 2020 – January 2022

Android Developer

Delhi, India

- Built native Android applications using **Kotlin** and **Java**, adhering strictly to **MVVM architecture** principles to ensure maintainability and scalability.
- Implemented real-time video and audio calling features for a **healthcare telemedicine platform** using third-party WebRTC SDKs, enabling seamless doctor-patient consultations.
- Utilized **Jetpack Components** (LiveData, ViewModel, Room) and **Retrofit** for robust networking, local data caching, and efficient data flow management.
- Integrated secure user authentication, session management, and role-based access control for healthcare data compliance.
- Participated in the complete SDLC including requirement analysis, design, development, testing, and production deployment.

KEY PROJECT PORTFOLIO

EarthLink | *Flutter, GetX, GraphQL, REST APIs* | Telecom & ISP

- Developed a comprehensive digital platform for a leading **U.S. Internet Service Provider**, enabling users to manage Fiber, 5G, and Satellite internet subscriptions via a single mobile interface.
- Integrated EarthLink Business modules providing robust connectivity management for enterprise clients, supporting high-speed plan upgrades up to **5 Gbps**.
- Optimized state management using GetX, ensuring high responsiveness and smooth navigation across complex account management workflows.

Mobile Petrol Station (MPS Pilot & Customer) | *Flutter, Bloc, Real-time Tracking, Maps Integration*

- Developed a petrol and diesel management ecosystem with separate **Pilot and Customer applications**, enabling seamless fuel ordering and delivery operations.
- Implemented **live order tracking**, delivery status updates, and real-time synchronization to enhance user experience and operational efficiency.
- Integrated **turn-by-turn navigation** and route optimization for pilots, supporting deliveries across various vehicles including cars and generator models.

Magnifi | *Flutter, Bloc, GraphQL, Socket.IO* | AI Fintech

- Developed an **AI-powered investment co-pilot** for the US stock market, delivering personalized portfolio insights and real-time analytics.
- Engineered real-time stock data feeds using **Socket.IO** with complex state orchestration via Bloc, ensuring accurate live market data delivery.
- Implemented secure **JWT-based authentication**, portfolio management, and transactional features meeting US financial compliance standards.

Ph7 Doctor & User Suite | *Kotlin, MVVM, Jetpack, Retrofit* | Healthcare

- Created a full-featured **telemedicine platform** enabling real-time video/audio consultations between doctors and patients, supporting remote healthcare delivery.
- Implemented appointment booking, prescription management, and patient records with end-to-end encryption and HIPAA-aligned data security practices.

Courier-Market | *Flutter, GetX, Google Maps API* | Logistics

- Built a bidding and load-tracking marketplace for the logistics industry with live map tracking for shipments and automated digital invoicing modules.
- Designed separate, role-specific interfaces for carriers and shippers using clean MVVM architecture, improving operational UX significantly.

Ramatou Express | *Flutter, GetX, Google Maps* | Delivery

- Developed a courier management ecosystem with separate Driver and User interfaces, featuring live order tracking, turn-by-turn route navigation, and delivery status updates.

ADDITIONAL PROJECTS

- Mister Clean** – On-demand laundry service application with driver integration (Flutter)
- Be You+** – Full-featured social media application with feed, stories, and messaging (Kotlin/Android)
- RealEnglish** – Educational platform for language learning with interactive modules (Flutter)
- Storm Street & Social Text** – Social networking platforms with feed and real-time chat (Kotlin)
- Crypto Mining & Spare Coin** – Cryptocurrency management and mining dashboards (Java/Kotlin)

EDUCATION

Post Graduate Program in Java (PGP Java) <i>NIIT Limited, Connaught Place</i>	New Delhi, India
Bachelor of Science in Computer Science (B.Sc. CS) <i>Maharshi Dayanand University (MDU)</i>	Rohtak, Haryana
Intermediate (12th Standard) <i>H.B.S.E Board</i>	Haryana

KEY ACHIEVEMENTS & HIGHLIGHTS

- Performance Optimization:** Improved app stability by 30% at Appentus Technologies through systematic bug resolution and code refactoring.
- Cross-Platform Expertise:** Successfully deployed 10+ applications on both Google Play Store and Apple App Store across diverse industry domains.
- Domain Breadth:** Delivered production-grade applications across Fintech, Healthcare, Logistics, Telecom, Social Media, and E-commerce sectors.
- Enterprise Clients:** Contributed to platforms serving enterprise clients including a leading U.S. ISP (EarthLink) and US stock market investment tools (Magnifi).
- Real-Time Systems:** Specialized experience in building real-time data applications using Socket.IO and GraphQL for financial-grade responsiveness requirements.
